**data sheet**      **product**    **TUBE POLYAMIDE**

Parameter	Value	Unit	Norm
Elastomer base	PA		
Geometry	Tube		
	1,02	g/cm <sup>3</sup>	ISO 1183
Hardness	63	Shore D	ISO 868
Tensile strength	25	MPa	ISO 527-1,2
	25	MPa	ISO 527-1,2
Dielectric strength	32	kV/mm	IEC 60243-1
Contact resistance	1E12	Ohm	ISO 60093
Temperature	-40 to +90	°C	
Color	natural		

**Specification**

./.

**Aging resistance**  
good UV and light resistance

**Chemical resistance**  
good pressure resistance and impact strength, high stress resistance  
water resistant and good chemical resistance to oils, greases, fuels, paint  
solvents and hydraulic fluids.  
Highly durable

The values of these specifications come from regular controls of the compounds with the aid of norm samples and perform an average. They correspond to the actual state of the knowledge, the latest development of the sciences and our experience. They do not specify sure properties for the finals products. The indications in this data sheet are only a description of the typical properties and represent an aid and information for the user to give him some suggestions for his own application. But it remains in his responsibility to make sure with a specific trial that our product suits for his own purpose.
